Nutrition 101: Screening and Assessment in Adult Populations

LEARNING OBJECTIVES:

- Describe the critical role of nutrition screening and assessment within the Nutrition Care Process (NCP) and articulate how these steps drive timely and effective nutrition intervention.
- Evaluate validated nutrition screening and assessment tools used in adult populations, including their purpose, strengths, and appropriate clinical application.
- Interpret evidence based guidelines that inform when and how to apply specific nutrition screening and assessment tools across diverse patient populations and clinical contexts.
